ata they provide to us. As part of this commitment some population counts of geographic areas are adjusted to include a group of persons reside or could reside. In addition a private dwelling must have a source of heat or power, a common hall lobby vestibule or stairway leading to the outside and in which a person or a group of persons could reside.

Settlements

listed in order to ensure confidentiality. Counts of the total population are rounded to a base of 5 for any number less than 5. A dwelling unit is defined as a separate living quarters that provides shelter from the elements as evidenced by complete enclosure. Persons who live permanently in a dwelling unit are considered permanent residents.

y dissemination block having a population of less than 15. Population counts for all standard geographic and enclosed walls and roof and by doors and windows that provide protection from wind rain and snow

areas above the dissemination block level are derived by summing the adjusted dissemination block costs.

unts. The adjustment of dissemination block counts is controlled to ensure that the population counts fc

or dissemination areas will always be within 5 of the actual values. The adjustment has no impact on the

· population counts of census divisions and large census subdivisions.
